

Advance Report

Assignment:
MZ-ABCDE-1

This report summarizes the overall quality of your edited manuscript. For each section, we provide specific comments on the quality and these are substantiated by examples (where available).

Structural Review

Overall Manuscript

- The author does not need to make major changes as the overall manuscript follows a logical order.

Title & Abstract

- The title is sufficiently informative and concise.
- In addition, it has been carefully checked to ensure that it clearly conveys the aim of the study.
- The abstract follows a logical structure.
- In the abstract, the purpose, methods and materials, results, and conclusions are appropriately stated.

Introduction

- The introduction clearly states the purpose and approach of the study.
- The statement of the relevance of the findings is included in the Introduction.
- The scope of the investigation is indicated.

Materials and Methods

- Appropriate description of the methodology is provided, and it can be reproduced by another investigator.
- The measurement procedures are appropriately presented.
- The statistical significance is appropriately evaluated. The data are statistically significant, and the samples are truly randomized.

Results

- The results are correctly stated in only the Results section.
- No discussion is present in the Results section; this section contains only results.
