School Choice

Contents: Background Reports, Viewpoints, In the News

"School Choice" is the common term for public policies intended to allow parents to choose elementary and secondary education options other than the assigned local public schools for their children. School choice emerged as a major policy issue with the No Child Left Behind Act of 2001 and its amendments to the Elementary and Secondary Education Act of 1965. These alternatives include charter schools, magnet school tuition vouchers and tax credits to subsidize attendance of private schools, homeschooling, and intra/inter district choice programs. Charter schools are public schools that operate under charter agreements and require students to apply to the school. Magnet schools are also public school options, usually specializing in a particular field or subject area such as science or art, and are open to any student within the district. Magnet schools have historically played a role in desegregation. Intra- and inter-district choice programs allow parents and students to stay within their home or neighboring district without the requirement to attend their designated and assigned home school.

These options, including homeschooling and private schools, fall under the purview of various local, State, and Federal level government education agencies. There are laws in almost every State and in the District of Columbia regulating school choice options. There are also programs at the Federal level allowing and encouraging school choice. Funding for these programs is provided by the U.S. Department of Education. School choice is a popular but also divisive political issue at all levels of government. Issues such as racial segregation, socioeconomic equity, the separation of church and state, and taxation and
