CAIRN INTERNATIONAL EDITION

Today, [CAIRN.INFO](http://www.cairn.info) offers the most comprehensive online collection of publications in French in humanities and social sciences. To make this content more visible and accessible to non-francophone scholars, [CAIRN.INFO](http://www.cairn.info), with the support of the CNL (Centre national du livre [National Book Center]), has designed a special interface enabling users to browse and easily find content from French journals without the need to speak a word of French:

[HTTP://WWW.CAIRN-INT.INFO/](http://www.cairn-int.info/).

All current issues are listed and their tables of contents can be browsed freely in English. For all issues, users can access abstracts in English, as well as, when available, full-text versions in English.

TECHNICAL SPECIFICATIONS

AUTHENTICATION

Access is available via IP authentication for an unlimited number of concurrent users. Remote access through authentication mechanisms such as reverse proxy servers is allowed. Cairn supports Central Authentication Service (CAS) Single Signature Online protocol and is also Shibboleth-compliant in several countries.

DOI

[CAIRN.INFO](http://www.cairn.info) has systematically acquired Digital Object Identifier (DOI) since 2008, for all journal articles released on [WWW.CAIRN.INFO](http://www.cairn.info). This helps Cairn to automatically link articles containing citations from other articles, to implement direct links in article bibliographies or to activate functions such as the "quoted by" feature.

SEARCH OPTIONS

Search forms support patterns and adjacency, as well as Boolean operators. Searches can be carried out by title, author, keywords, year of publication, discipline or title of publication:

[HTTP://WWW.CAIRN.INFO/RECHERCHE_AVANCEE.PHP](http://www.cairn.info/recherche_avancee.php).

Searches can be refined through a faceted search engine (type, discipline, date, etc.) and results are available at the article/chapter level and by issue/book one.

All journal articles are available in PDF and HTML formats, either online or to be downloaded and printed.

ALERTS

Any user can ask for an e-mail alert on a journal or an author, so as to be automatically informed of new publications: [HTTP://WWW.CAIRN.INFO/MES_ALERTES.PHP](http://www.cairn.info/mes_alertes.php).

In addition, thematic RSS feeds enable users to follow any updates to the portal:

[HTTP://WWW.CAIRN.INFO/ABONNEMENT_FLUX.PHP](http://www.cairn.info/abonnement_flux.php).

FEDERATED SEARCHING

The site can be accessed through the main federated search and discovery tools. Cairn is also OpenURL-compliant.

The site also supports the "get" method using a base URL (where X is the searched term):

[HTTP://WWW.CAIRN.INFO/RESULTATS_RECHERCHE.PHP?SEARCHTERM=X](http://www.cairn.info/resultats_recherche.php?searchterm=X).

METADATA STANDARDS

Cairn's metadata can be harvested freely through an OAI-PMH-compliant interface:

[HTTP://OAI.CAIRN.INFO](http://oai.cairn.info), which also offers DUBLIN Core and METS formats.

A specific website is also dedicated to eBooks and pocket encyclopedias, "La Boutique":

[HTTP://LABOUTIQUE.CAIRN.INFO](http://laboutique.cairn.info), which enables librarians to follow these offers and to collect metadata in different formats: KBART-compliant CSV files and MARC records.

STATISTICS AND CUSTOMIZATION

COUNTER-compliant statistics reports are available online for all institutions which have subscribed to a license, through an administration tool: [HTTP://ADMIN.CAIRN.INFO](http://admin.cairn.info). This tool also enables librarians to customize Cairn for their audience: discipline, content available, activation/deactivation of pay-per-view possibilities, etc.
